

What is NSMM?

Nordic Society for Medical Mycology was founded in Copenhagen in August 2003 as a non-profit making scientific association where scientists and clinicians from the Nordic countries meet to discuss all subjects within mycological diseases of man and animals.

What is the purpose of NSMM?

- To encourage the practice and study of all aspects of medical mycology
- To facilitate, on a Nordic basis, the exchange of ideas, information and training pertaining to medical mycology.
- To organise at least one annual Nordic Scientific Meeting.

Who can join NSMM?

- Any doctor or laboratory scientist engaged in the practice of medical mycology.
- Any doctor or laboratory scientist carrying out research and/or development in medical mycology, within the fields of infectious diseases and clinical microbiology.
- Any student having an interest in medical mycology.

Corporate members are accepted on a national basis as non-voting members, with an annual fee, which is 100 times that of the annual fee of individual members.

Interested in joining?

Go to our web-site www.nsmm.nu and register online. Membership is valid as soon as the membership fee is. Unless there are directions to the contrary, membership nominations approved before September 1st are credited to the current year. Nominations approved after September 1st will become effective the following January. Regular membership are initiated and renewed in January each year.
